

## Read

Read Psalm 104 before you come to group.

## Discuss

- Where is your favorite place in Madison to discover the God of Creation? Where is your favorite place outside of Madison? If you're meeting online, take a minute to google a picture of your favorite place and share a link in the chat.
- Read through Psalm 104 together as a group. What do we learn about who God is? What do we learn about who we are?
- What are some things that you are currently doing to care for creation?
- What are some ways in which you can better care for creation?

## Pray

Pray Psalm 104 together as a group. Thank God for all of the favorite places that were shared at the beginning of the meeting. Ask God to grow your understanding of who He is and His love for the world, as well as to show you ways that He wants you to partner with Him in caring for His creation.

## Next Steps

Spend time outside this week. Take a walk in the arboretum. Hike on a trail near your home. After it gets dark, lay on a blanket in your backyard and take in the night sky. As you do, pay attention to the sights and sounds and smells around you. Spend time praising God for this beautiful world He's created!
